

Extended Life Gas Springs

Industrial Gas Springs™ Extended Life Gas Springs provide increased service life and consistency to applications that require reliability and durability. Their proprietary design makes them capable of handling up to 125,000 cycles, extreme temperature ranges, and demanding environments. Available in stainless steel and painted steel, Extended Life Gas Springs are manufactured in an AS9100D and ISO 9001 certified facility and supplied as standard with Ball-Joint End-Fittings.

PRODUCT LINE

These two great companies, both experts in counterbalance solutions, have joined forces to provide one of the most extensive product portfolios in the business. No need to shop around, ASRaymond has a counterbalance solution to fit most manufacturer's application requirements.
